Seeking Committed Community Members to Join New Stakeholder Advisory Group

At the September 22nd City Council Legislative Hearing, Resolution 21-0163 was unanimously passed, establishing a new Stakeholder Advisory Group (SAG) for RiverRenew. Building off the foundation from previous SAGs, this group will monitor construction progress on the Tunnel System, the largest infrastructure project in Alexandria’s history.

We're looking for a balanced and diverse group of citizens representing neighborhoods, businesses, and various interests who commit to being active and engaged in the stakeholder process.

- **Outfall 001:**
  - Nomination by North Old Town Independent Citizens’ Association (NOTICe)
  - Tobacco Quay, Waterfront Residences, or Rivergate
- **Outfall 002:**
  - Nomination by Old Town Civic Association
  - South Old Town
- **Outfalls 003/4:**
  - Nomination by Eisenhower Partnership
  - Carlyle community or Duke Street corridor
- **At-Large:**
  - Resident with an interest or expertise in diversity, race, and social equity
Apply to be a RiverRenew SAG member today!

Applications will be accepted through November 6, 2020 at RiverRenew.com/sag.

**SAG Selection Timeline**

**September 23 - November 6**
Accepting applications

**September 22**
City Council approves/endorse SAG

**Early December**
Appointment letters sent

**January 2021**
SAG Launches - First meeting of 2021 SAG to take place

**Making Way for Healthier Waterways**

One of the first steps toward healthier waterways involves the demolition of the Robinson Terminal North (RTN) warehouse. The RTN warehouse is located immediately east of Union Street between Oronoco Street and Pendleton Street and primarily served as a newsprint storage facility for the Washington Post from 1969 to 2013.
AlexRenew plans to demolish the steel structure to grade this fall to pave the way for the Tunnel System Project to start in Spring 2021. While construction of the diversion facility is necessary to address the discharge of combined sewage at Outfall 001, the demolition work is not associated with the Tunnel System Project.

AlexRenew is currently conducting outreach to inform residents and neighbors about the demolition process and working with the City to finalize the permitting process.

For an inside look at the demolition site and a preview of the construction activity to come, check out the video below or click here!
Do your part this Sunday by participating in World Rivers Day! Grab a trash bag, your mask, and learn more about protecting our Potomac from our friends at the Potomac Riverkeeper Network.

Tunnel System Project Update

AlexRenew is in the final stages of the procurement process for the Tunnel System Project. Currently, we're on-track to issue a Notice to Proceed for construction by December 1, 2020.

Sneak Peek: New Lab Facilities

RiverRenew construction at AlexRenew's treatment plant has remained on-track despite impacts from the ongoing pandemic. AlexRenew's existing laboratory space will be demolished this fall, and new facilities are being constructed to relocate this essential work.

Check out this video sneak peek from the construction team as they put the finishing touches on the new lab space!
